Box No. IV Lack of unity of invention

1. ☐ In response to the invitation to restrict or pay additional fees the applicant has, within the applicable time limit:
- ☐ restricted the claims
 - ☐ paid additional fees
 - ☐ paid additional fees under protest and, where applicable, the protest fee
 - ☐ paid additional fees under protest but the applicable protest fee was not paid
 - ☐ neither restricted the claims nor paid additional fees
2. ☒ This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.

3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is:

- ☐ complied with.
- ☒ not complied with for the following reasons:

The international application lacks unity of invention as there is no clear common novel feature between claims 1 and 27.

Claim 1 defines a microwave transparent food supportive device whereas claim 27 defines a food supportive device including a foundation base which folds out like a book.

This authority did not invite the applicant to restrict or pay additional fees as all features of the claims were searched and a meaningful opinion could be expressed on all claims.

4. Consequently, this report has been established in respect of the following parts of the international application:

- ☒ all parts.
- ☐ the parts relating to claims Nos.

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty (N)	Claims 1 to 27.	YES
	Claims	NO
Inventive step (IS)	Claims 1 to 27.	YES
	Claims	NO
Industrial applicability (IA)	Claims 1 to 27.	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)

Novelty (N) and Inventive Step (IS) Claims 1 to 27.

The claims as amended are directed to:-

1. A microwave transparent food supportive device used for microwave heating, cooking or drying of foods including: a plurality of food contact areas elevated from and substantially integral to a foundation that enables the support of food placed directly on the contact areas, wherein spaces between the elevated contact areas and the foundation form conduits adapted to vent the moisture from the food when being heated, cooked or dried.

2. A food supportive device for microwave heating, cooking or drying of food including: a plurality of food contact areas elevated from and substantially integral to a foundation that enables the support of food placed directly on the contact areas, wherein spaces between the elevated contact areas and the foundation form conduits adapted to vent the moisture from the food when being heated, cooked or dried, and wherein the supportive device includes a foundation base which folds like a book and the food contact areas pop up when the base is opened into operative form.

No individual citation or obvious combination of citations disclose these features. The closest art may be seen in the following documents:
